

Chris White

This assignment took me approximately 6 hours.

I thought this assignment was confusing, it took me a lot of time to figure out what layout I should use in which spot. I am also not sure why I should be using a relative layout for this particular assignment.

Everything in this assignment is working for me except I couldn't figure out how to get the text to align with the buttons.

I couldn't figure out how to get the text to align with the buttons because I couldn't reference the buttons ID's because they were in a different layout then my text was.

I expect to get full credit for this assignment because I have included all of the required content.
